

## EXPOSED COAT

### YOUR EXPOSED AGGREGATE ULTIMATE ENHANCEMENT AND SHIELD

Introducing our revolutionary custom designed exposed aggregate concrete sealer. Engineering a cutting-edge formulation specifically designed for Exposed Aggregate concrete contractors who demand perfection.

EXPOSED COAT merges ease of application with uncompromising performance. By understanding the requirements of contractors, we developed EXPOSED COAT exposed aggregate sealer to be easily applied by spray unit or roller. Additionally, it boasts improved moisture tolerance when compared to traditional solvent clear sealers. EXPOSED COAT can be used on freshly poured exposed aggregate concrete.

One of the key advantages for contractors is the potential cost effectiveness of EXPOSED COAT. With an estimated coverage of up to 6 square meters per litre, it offers great value for its coverage area, potentially reducing the amount of product needed for a given project.

Overall, EXPOSED COAT is a product that addresses both the practical considerations of application and the performance requirements. Experience the convenience, efficiency, and outstanding performance of EXPOSED COAT as it transforms your exposed aggregate projects into a resilient and visually stunning masterpiece.
