Obtain special instructions before use.
Do not handle until all safety precautions have been read and understood.
Do not breathe mist/vapours/spray.
Use only outdoors or in a well-ventilated area.
Do not eat, drink or smoke when using this product.
Wash skin thoroughly after handling.
Wear protective gloves/protective clothing/eye protection/face protection/hearing protection.
Avoid release to the environment.

DIRECTIONS:

- Apply Prime Sealer Stripper thickly (2-3mm) with a brush or roller
 - Allow coating to soften and blister. This process can take between 10-60 minutes.
 - Do not allow coating to completely dry before removing with a scraper
 - Apply and work on only small areas at a time so coating will not dry out
 - When all of the old coating has been fully removed with a scraper or high pressure cleaner, wash the surface thoroughly with water
 - Ensure there are no traces of Prime Sealer Stripper on the surface before applying any further sealer
 - Immerse used brushes in Prime Sealer Stripper until soft and then wash up with water.
- Coverage will vary according to thickness and condition of the sealer to be removed. Average coverage would be 0.75m²/litre.

IF SWALLOWED: Immediately call a POISON CENTRE or doctor/physician. Rinse mouth.
IF ON SKIN: Wash with plenty of water. Call a POISON CENTRE or doctor/physician if you feel unwell.
IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTRE or doctor/physician.
If skin irritation occurs: Get medical advice/attention.
If exposed or concerned: Call a POISON CENTRE or doctor/physician.
Take off contaminated clothing and wash it before reuse.
Store locked up in a well-ventilated place. Keep container tightly closed and cool.
Dispose of contents/container to appropriate waste site or reclaimer in accordance with local and national regulations.
If medical advice is needed, have product container or label at hand.
Refer to the Safety Data Sheet before use.
